

Kayden provides replacement shaker screens in Canada for all major OEM shaker manufacturers. These screens are proudly built in the USA by Screen Tech International, using the highest quality API Standards. These quality manufacturing standards mean each screen is built to the tightest tolerances and ensures long-lasting performance in the harshest conditions.

FEATURES AND BENEFITS

- Unique design processes at higher flow rates, resulting in a higher quality fluid, and reduced wear and tear on other solids control equipment and rig components
- ST Mesh has wire diameter approximately 50% greater than conventional mesh, and is designed to last longer, resist blinding, and remove fine solids. Sometimes lasts three to four times longer than the competition
- Lab-tested to ensure the highest performance in all applications
- Quality metal increases the reliability and lifespan of the screen, ensuring further savings to the operator

KAYDEN OFFERS REPLACEMENT SCREENS FOR THE FOLLOWING BRANDS:

Derrick™
