

Kayden Industries provides fully integrated dewatering trailers with a single centrifuge setup, complete with pumps, and polymer injection units. Kayden units are designed and built to transport easily and efficiently while operating reliably in the harshest environments around the world. Dewatering is both an economical approach to any operation by reducing the reliance on fresh water and minimizing disposal costs.

### TECHNICAL SPECIFICATIONS

<b>Length</b>	52' - ¾"
<b>Transport Width</b>	8' - 6"
<b>Operation Width</b>	12' - 2"
<b>Transport Height</b>	13' - 4"
<b>Operation Height</b>	20' - 10"
<b>Estimated Tare Weight</b>	95,327 lb

Meets all Canadian Transportation Compliance and Standards

Kayden Mammoth-2276 Centrifuge, Polymer tank and 150kva diesel operated generator, mounted on triple tandem wheeled trailer.
